

STRATEGIC FRAMEWORK 2022-2027

Purpose:

The General Assembly and the Board of Education believe that the fundamental goal of the public schools of the Commonwealth must be to enable each student to develop the skills that are necessary for success in school, preparation for life, and reaching their full potential. The General Assembly and the Board of Education find that the quality of education is dependent upon the provision of (i) the appropriate working environment, benefits, and salaries necessary to ensure the availability of high-quality instructional personnel; (ii) the appropriate learning environment designed to promote student achievement; (iii) quality instruction that enables each student to become a productive and educated citizen of Virginia and the United States of America; and (iv) the adequate commitment of other resources.

Bedford County Public Schools affirms the goals set forth by the state of Virginia's Department of Education and have developed the following strategic framework to identify goals for the school division. The purpose of the plan is to identify goals and areas for growth and improvement, measurable indicators of progress, associated timelines and resources, and evidence to monitor progress.

The Process:

On June 1, 2021 Dr. Marc Bergin began his tenure as superintendent of Bedford County Public Schools. Upon his arrival, he created a Superintendent's Entry Plan to serve as a blueprint to learn more about our schools and community. His time was prioritized to listen, learn and connect with ambitious learners, talented teachers and staff, dedicated school and district leaders, supportive families, and engaged community members to learn more about the Bedford County Public Schools.

Open invitation, face-to-face and virtual forums were advertised and scheduled throughout the community to provide opportunities for stakeholder voice within the six public libraries and staff meetings in all schools, civic leader offices, faith-based organizations, media outlets and with numerous educational partners. Two questions channeled conversations and were designed to gather ideas related to sustaining the good work currently happening in BCPS and determining ways to strengthen our partnerships with community stakeholders (both internal and external) to improve conditions for teaching and learning. The questions posed were:

1. What do you love about Bedford County Public Schools (i.e., our strengths as a school division upon which we can build?)

2. What would make Bedford County Public Schools an even stronger school division (i.e., opportunities for growth as a school division which we can address together?)

The confluence of insights and observations, the division's portfolio of performance data, insights from the division's leadership team and the voices of our community stakeholders suggested that there are clear strengths and aspirations for the children of our community and our school division. The hopes and dreams of these many stakeholders revolve around creating a world-class educational experience for children and strengthening the relationships amongst and between the many people whose lives are touched by our schools. Numerous strengths were prominent during the Superintendent's conversations and observations. Three strengths were noted often by all groups:

1. Bedford County Public Schools was described as "the beacon of our community." The sense of community throughout the division was described in almost every conversation with statements such as:
 - a. Our schools have joyful and welcoming environments and everyone takes care of one another.
 - b. The generations of families and the staff members who are graduates of BCPS make our school division unique and create deep connections to the schools and community.
 - c. Our community is charitable, giving, and caring.
 - d. Our school staff genuinely care for the success of our students.
 - e. Student voice is valued.
 - f. Students are respectful to each other and the adults.
2. The people who serve our children (teachers, staff, administrators, central office leaders and community members) are caring and committed.
 - a. Words used to describe our BCPS team included: collaborative, supportive, passionate, gracious, caring, reliable, and dedicated, to name a few.
 - b. School leaders and teachers shared appreciation of the restructuring of the central office team and have noticed an increase in the visibility of our support team.
 - c. The support of the Education Foundation along with our PTAs and Booster Clubs are also appreciated by our community.
3. Stakeholders celebrated several learning opportunities and suggested BCPS continue to focus our efforts in the following areas to aspire to greatness:

- a. The preparedness of the school division for remote learning as a result of the pandemic coupled with 1:1 devices and other technology infrastructure and support.
- b. Strong extracurricular activities including Fine Arts, athletics, FFA, academic competitions, and other character building opportunities for students.
- c. The ability for students to acquire career credentials in partnership with the Susie G. Gibson Science and Technology Center.

As Dr. Bergin reflected on the numerous conversations and review of the data, several common themes surfaced as key aspirations to influence the full potential of our students:

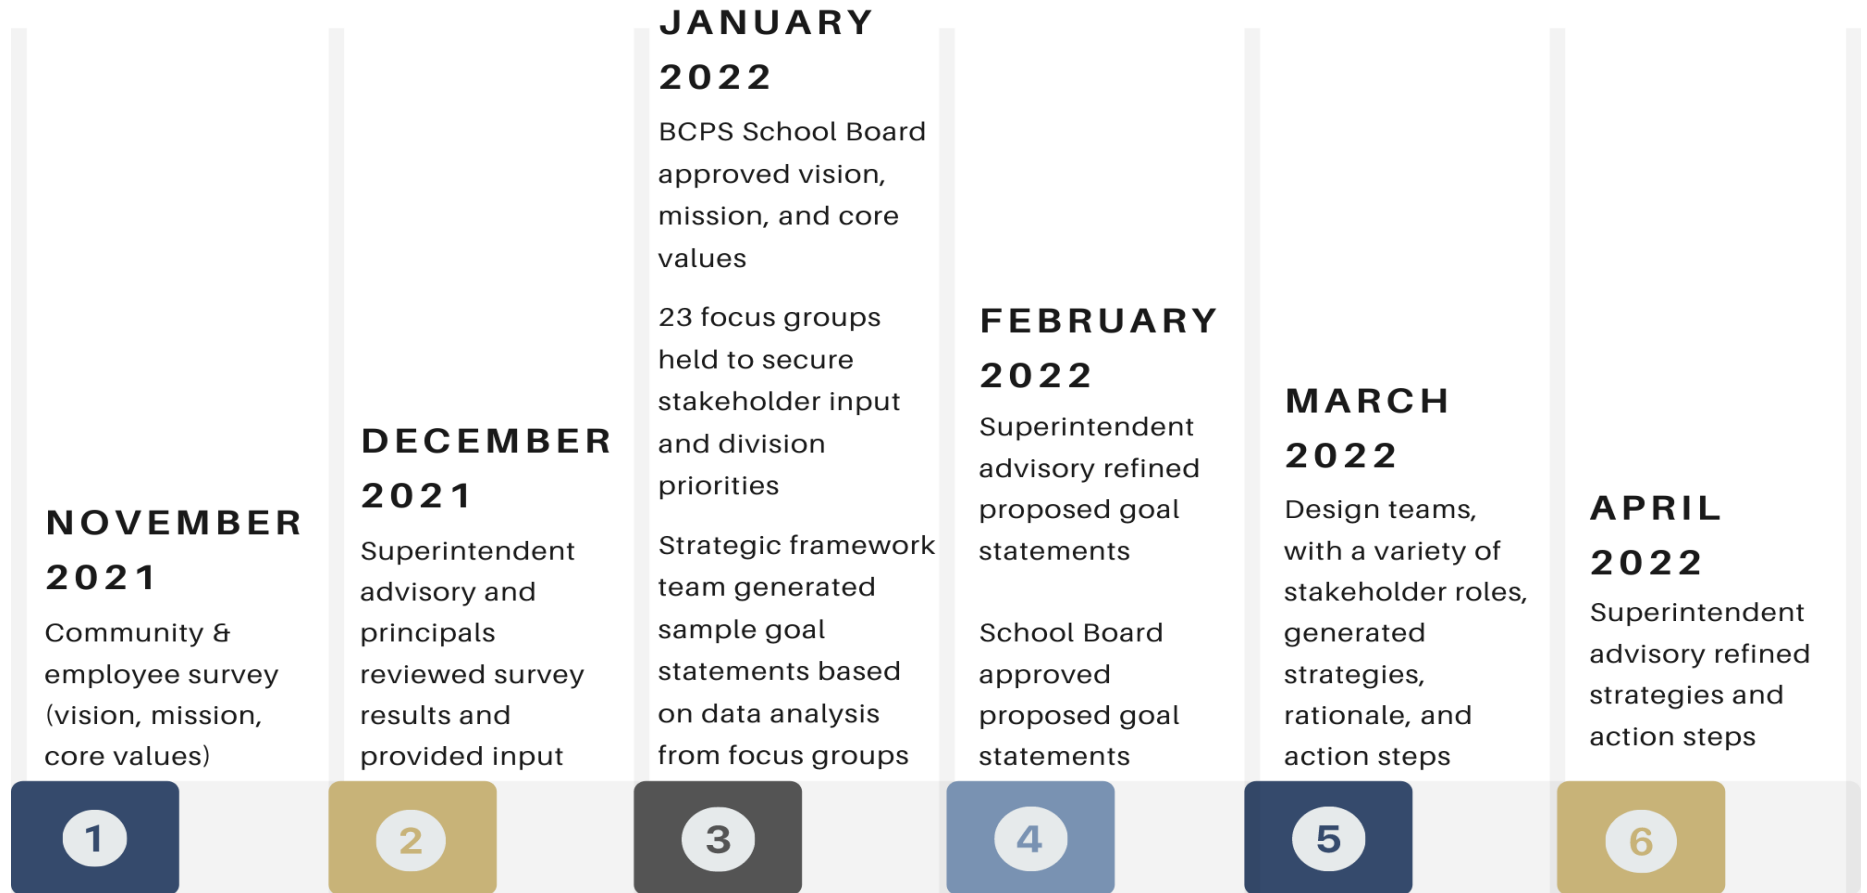

- Invest in Our People
- Accelerate Unfinished Learning
- Expand College, Career Ready, and Workplace Development Opportunities
- Support Social and Emotional Wellness
- Boost Equal Educational Opportunities

A strategic planning committee was formed in the fall of 2021 to focus on moving Bedford County Public Schools forward, using the information presented in Dr. Bergin's post-entry reflections. The committee planned opportunities for stakeholders to provide feedback on the division's current strategic plan. In October 2021, a survey was made available to students, parents, staff, and other members of the community to gather feedback regarding the school division's mission, vision, and core values. Based on an analysis of the data generated, new mission and vision statements were crafted and shared with the School Board; however, it was determined that the strong core values previously adopted should remain the same.

The strategic planning committee then used Dr. Bergin's five focus areas to generate four draft goal statements to share with stakeholders. Twenty-three focus group sessions were conducted in January - that consisted of hundreds of parents, students, teachers, support staff, and other community partners - in order to provide input on the four proposed goals.

The data gathered from the focus groups was then reviewed by the Superintendent's Advisory, the executive leadership team, and the strategic planning committee, before being shared with the School Board. Next, four design teams were created, with members from a variety of stakeholder groups, to further define each goal by creating strategies, action steps, and measurable indicators of success.

The end product of the design teams is this strategic framework, which will guide the work of Bedford County Public Schools over the next five years, through June 2027, to ensure the continued success of the school division by creating high academic expectations for all students, within safe and supportive learning environments, supported by a high quality workforce, and in collaboration with mutually supportive partnerships. The details of this new strategic framework are provided in this document.

STRATEGIC TIMELINE

STRATEGIC FRAMEWORK

VISION
Building **C**itizens.
Promoting **S**uccess.

MISSION
Bedford County Public Schools will provide equal opportunities to enable all students to think critically, collaborate, create, communicate, and become productive citizens.

GOAL 1
High Academic
Expectations

GOAL 2
Safe and Supportive
Learning Environments

GOAL 3
High Quality
Work Force

GOAL 4
Mutually Supportive
Partnerships

Focus on
students.

Energize the
learning by creating
safe and dynamic
learning
environments.

CORE VALUES

Collaborate with
staff, families, and
the community to
support learning.

Challenge
students to
reach personal
goals every day.

Act with
integrity.

GOAL 1: HIGH ACADEMIC EXPECTATIONS

Bedford County Public Schools will maintain high academic expectations and support all students in attaining foundational knowledge, transferable skills, and post-graduation plans.

Rationale for Goal:

Literacy achievement for the students of Bedford County Public Schools has fluctuated in recent years. Foundational literacy instruction and early intervention are essential to student proficiency in grade level reading. Reading proficiency levels at third grade, a critical indicator of later reading success, show that there is a lack of progress towards adequately preparing children for future academic success. Third-grade reading level is linked to long-term outcomes. Students who do not read proficiently by third grade tend to remain behind in subsequent years as reading instruction shifts from learning to read, to reading to learn. Virginia Standards of Learning (SOL) assessments results indicate that approximately 69% of BCPS children in third grade are performing at a proficient level in reading. Data from the Phonological and Literacy Screening (PALS) assessments results indicate that approximately 72% of BCPS children in third grade have met the benchmark which is an indicator of grade-level proficiency in reading, with some achievement groups performing below their peers.

Numeracy achievement for the students of Bedford County Public Schools shows weaknesses in number and number sense, as well as computation and estimation. Addressing foundational skills and reasoning is essential to numeracy achievement. Students who lag behind in math at fifth grade tend to remain behind in subsequent years. Virginia Standards of Learning (SOL) assessments results indicate that approximately 60% of BCPS children in fifth grade are performing at a proficient level in math. Best practices include providing strong, effective instruction that focuses on strengthening students' conceptual understanding to build critical thinking, reasoning, and problem solving skills.

Students graduating on time is vital for their post secondary success. Early student involvement in academic and career planning is critical to support students in meeting their future so that students will be able to demonstrate that they are post-secondary ready after high school graduation. Post secondary success is demonstrated when students are college, career, and/or life ready. The [National College and Career Readiness Indicators](#) state that a student is, "life ready" if they "possess the growth mindset that empowers them to approach their future with confidence, to dream big, and to achieve

big.” BCPS students who are college, career, and life ready will be critical and creative thinkers, collaborate with others creatively, and ultimately become productive citizens in their community.

Indicators of Success:

- Over the next five years, the number of preschool classrooms for three and four-year-old children will increase by at least three classrooms.
- Students reading on or above grade level, as measured by meeting Virginia Kindergarten Readiness Program (VKRP) benchmarks, meeting Phonological Awareness Literacy Screening (PALS) developmental ranges, or meeting Standards of Learning (SOL) benchmarks prior to leaving elementary school (PreK-5) and by the end of milestone years (Grades 3, 5, 8, and 11) will increase.
 - [VKRP Indicators of Success](#)
 - [PALS / SOL Scores - Literacy](#)
- Students showing proficiency on mathematical concepts as measured by meeting Virginia Kindergarten Readiness Program (VKRP) benchmarks or meeting Standards of Learning (SOL) benchmarks will increase by the end of milestone years (Grades PK, K, 3, 5, 8, and Algebra I)
 - [VKRP Indicators of Success](#)
 - [Numeracy Indicator of Success](#)
- Increase the number of students achieving a 3 or higher score on the Advanced Placement Coursework exams from 45% to 60% and increase the number of students achieving a 2 or higher score on the Advanced Placement Coursework exams from 76% to 85%.
- Over the next five years, 98% of BCPS students will graduate from high school and all BCPS seniors will demonstrate post-secondary readiness.
- After graduation from BCPS, students will enter the workforce, enlist, or obtain a post-secondary degree. As an indicator of post-secondary readiness, BCPS will monitor student completion of at least two of the following benchmarks:
 - 90% Attendance rate
 - Workplace Learning Experience
 - Industry Credential or Certification
 - Participation in two or more organized co-curricular activities
 - Completion of an Internship, Job Shadowing, or Career Exploration Activity
 - Score a composite score of 20 or higher on the ACT

- Score a composite score of 1020 or higher on the SAT
- Score 3 or higher on an Advanced Placement (AP) exam
- Complete at least 2 dual enrollment or AP courses with a grade of C or higher
- Completion of a CTE sequence
- Earn a scale score of 32 or higher on the ASVAB

Strategy 1: Preschool / Early Literacy and Social Skills

Expand access to BCPS preschool programs so that students have the opportunity to participate in high quality early learning experiences that strengthen social-emotional and foundational literacy skills, which are essential to school readiness.

Timeline	Resources	Person(s) Responsible	Progress Monitoring	
			Dates	Artifacts
Action Step: Increase the number of preschool opportunities for Bedford County students.				
August 2022	VPI Grant Funding Preschool Staff Facilities	Director of Curriculum and Instruction Director of Special Education	By June - Notification of VPI Grant Funding By August - Open new preschool classrooms By August - Assess needs	Number of preschool classrooms
Action Step: Provide professional development for all preschool staff in a) phonological awareness to support early literacy and b) social-emotional skills to promote self-regulation.				
August 2022	PALS Pre-K VKRP CBRS Heggerty Phonics Program HighScope curriculum Sondag System - Let's Play Learn Conscious Discipline	Director of Curriculum and Instruction Director of Special Education Supervisor of Elementary Special Education Kindergarten Readiness Facilitator Principals	Annually during the months of August, September, and October.	Division professional development calendar Professional development attendance logs
Action Step: Provide systematic and explicit early literacy instruction in the areas of alphabet knowledge, beginning sound awareness, rhyme awareness, print and word awareness, and name writing for all students.				

August 2022 - May 2023	PALS instructional resources Heggerty Phonics Program Sunday System - Let's Play Learn	Director of Curriculum and Instruction Director of Special Education Supervisor of Literacy and Title I Principals Classroom Teachers	Review Fall, Mid-Year, and Spring reports Daily lesson plan reviews Annually assess needs	Teacher lesson plans PALS reports
---------------------------	--	---	---	--

Action Step: Strengthen family and community partnerships by providing resources to support early literacy, social-emotional development, and establishing a family advisory committee.

August 2022 - May 2023	Family Literacy Events Family and Teacher Facilitator	Director of Curriculum and Instruction Director of Special Education Kindergarten Readiness Facilitator Family and Teacher Facilitator	Twice per semester during 2022-2027	Family event attendance logs Preschool family website Family literacy kits Kindergarten readiness kits Family advisory committee attendance logs Community partner attendance logs
---------------------------	--	---	-------------------------------------	---

Strategy 2: Literacy

Adopt and implement an evidence - based, PreK - 12 comprehensive literacy plan, which includes strategies to address opportunity and achievement gaps among student subgroups so that all students attain foundational knowledge and transferable skills that cultivate confident, proficient, lifelong readers.

Timeline	Resources	Person(s) Responsible	Progress Monitoring	
			Dates	Artifacts

Action Step: Create a literacy team to investigate, summarize, publish and communicate Science of Reading and adolescent literacy research to explore the role of explicit and systematic decoding instruction, the most effective format for phonics routines, the role of comprehension and vocabulary progressions to effective literacy and the connection between research and classroom practice in grades PreK-12. Include research on a framework for intervention.				
July - August 2022	Science of Reading Research and Presentations Scarborough's Reading Rope Literacy research-presentations for the five elements of reading instruction (phonemic awareness, phonics, fluency, vocabulary, and comprehension). Heggerty Resources: PreK-2- Early Literacy through Primary 3-5 Primary Extension (Bridge the Gap for 2-5 intervention) Why Reading by the End of Third Grade Matters	Director of Curriculum and Instruction Director of Special Education Supervisor of Literacy and Title I Supervisor of Elementary and Secondary Special Education Principals Reading Specialists Reading Coaches	By August 2022, team members meet, develop, and review the plan for the presentation and mode of delivery	Final presentation posted to ELA Canvas course for all ELA teachers New hire training agendas / attendance logs Meeting agendas
Action Step: Create, publish, and communicate a PreK - 12 comprehensive literacy framework that integrates evidence - based approaches and strategies in order to provide a consistent structure for teaching and practicing the skills of effective reading and writing.				
Annually, August 2022-2027	Literacy Framework Samples	Director of Curriculum and Instruction Director of Special Education Supervisor of Literacy and Title I Supervisor of Elementary Special Education Principals	By August of every school year revise the framework, as needed.	Notes from vetted literacy framework samples Teacher lesson plans

		Reading Specialists Reading Coaches		
Action Step: Adopt and implement evidence - based instructional resources to support the BCPS Literacy Framework districtwide.				
2022-2027	Heggerty Resources: PreK-2- Early Literacy through Primary 3-5 Primary Extension (Bridge the Gap) for 2-5 intervention)	Director of Curriculum and Instruction Director of Special Education Supervisor of Literacy and Title I	PD will begin in the 2022-2023 school year and will be given annually	Professional development on new curriculum for ELA K-5 and 6-12 Usage reports / observations Data from embedded assessments

Strategy 3: Numeracy

Research, design, and implement a division numeracy framework that focuses on building conceptual understanding and number and number sense so that students gain foundational knowledge that enables them to develop transferable skills, master critical learning phases, and prepare them for future success in algebraic thinking and post-graduation plans.

Timeline	Resources	Person(s) Responsible	Progress Monitoring	
			Dates	Artifacts
Action Step: Create a numeracy team to research numeracy plans that address number and number sense in PK-8 and the implications of number and number sense on algebraic thinking for future outcomes in grades 9-12. Include research on a framework for intervention.				
July - August 2022	Math Diet C-R-A Framework	Director of Curriculum and Instruction Director of Special Education Supervisor of Math	By August 2022, team members meet, develop, and review the plan for the presentation and mode of delivery	Vetted numeracy framework samples Final presentation posted to math Canvas course for all math teachers
Action Step: Create, develop, and communicate a numeracy framework for PK-12 for numeracy instruction, including intervention.				
Annually, August 2022-2027	Research	Director of Curriculum and Instruction	By August of every school year revise the framework, as needed	Division Numeracy Framework

	Numeracy Framework Samples	Director of Special Education Supervisor of Math Principals		
Action Step: Provide and implement resources and training to support the BCPS numeracy framework for instruction in PK-12.				
Annually, August 2022-2027	BCPS Numeracy Framework PD Calendar	Director of Curriculum and Instruction Director of Special Education Supervisor of Math Supervisor of Professional Learning	PD will begin in the 2022-2023 school year and will be given annually	Division professional development calendar

Strategy 4: Graduation and Post-Secondary Plans

Increase the on-time Graduation Rate from 92.4% during the 2020-2021 school year to 95% for the 2023-2024 school year to over 98% for the 2026-2027 school year so that students demonstrate post-secondary readiness and transferable skills.

Timeline	Resources	Person(s) Responsible	Progress Monitoring	
			Dates	Artifacts
Action Step: Explore interests and pathways to begin developing an Academic & Career Plan in 7th grade. Counselors and staff will continue working with students throughout middle and high school to maximize plans for future coursework to include courses that are aligned with interests and long-term goals. Long-term goals will be developed with the intent of developing college, career, and life ready students by monitoring indicators of post-secondary readiness.				
Annually, October 2022-2027	Major Clarity National College and Career Readiness Indicators South Carolina Education: College and Career Ready	Director of Curriculum and Instruction Director of Special Education Director of Student Support Supervisor of Secondary Special Education Principals	By October each school year	Major Clarity Completion Report

		Counselors		
Action Step: Support students with two or more failing grades in core content areas by ensuring each Middle School develops a <i>Student Support Team</i> which meets weekly to discuss needed support and interventions. Following the conclusion of each school year, middle schools will communicate information to high schools regarding rising ninth grade students who received interventions during middle school.				
Annually, August 2022-2027	Major Clarity National College and Career Readiness Indicators	Executive Director of School Administration Director of Curriculum and Instruction Principals	By August of each school year. Teams will meet at least monthly	Student Support List with Interventions listed
Action Step: Develop a <i>Graduation Support Team</i> specific to supporting students in meeting graduation requirements. The teams will meet regularly to discuss needed support and interventions. In addition to instructional staff, teams should include IDS staff and representatives from the Alternative to Suspension Program.				
Annually, August 2022-2027	Major Clarity National College and Career Readiness Indicators	Executive Director of School Administration Director of Student Support Principals Counselors	By August of each school year. Teams will meet at least monthly	Student-at-Risk List
Action Step: Identify rising 10th, 11th, and 12th grade students at risk of not meeting graduation requirements on time and communicate this to the <i>Graduation Support Team</i> . As students are identified, progressive interventions will be implemented to support students in graduating on time. The list will include seniors who are in danger of failing classes, lacking a CTE credential and/or verified credits, or lacking any college and career indicators of post-secondary success.				
Annually, September 2022-2027	Major Clarity National College and Career Readiness Indicators	Executive Director of School Administration Director of Student Support Principals Counselors	By September of each year	Student-at-Risk List with interventions listed

Action Step: Submit a list of seniors who are at-risk of not graduating to the Director of Curriculum and Instruction. Administration and the *Graduation Support Team* will work with the student, parent, and teachers to implement interventions. During the fourth quarter, more frequent at-risk list updates will be submitted upon the direction from the Executive Director of School Administration and Director of Curriculum and Instruction. Of those students who do not graduate on time, staff will provide additional support for these students including exploration of alternative programs available in BCPS.

Quarterly, 2022-2027	Alternative Education Center	Executive Director of School Administration Director of Student Support Director of Curriculum and Instruction Principals Supervisor of the Alternative Education Center Counselors	At the end of each quarter of each year	Student-at-Risk List with interventions listed
-------------------------	------------------------------	---	---	--

GOAL 2: SAFE & SUPPORTIVE LEARNING ENVIRONMENTS

Bedford County Public Schools will provide safe and supportive learning environments, both physically and emotionally, which enable all students to think critically, collaborate, create, communicate, and become productive citizens.

Rationale for Goal:

It is important that all schools be safe and supportive learning environments. This encompasses the physical learning environment and the protective emotional care that are provided to all students.

Input from surveys, focus groups, and diverse stakeholders indicates a need for building improvements, welcoming and accessible spaces, and improved safety measures. Some BCPS schools have multiple buildings/open campuses and therefore multiple points of entry. In addition to facility attributes, the work of staff in creating and sustaining positive and supportive learning environments is critical. School discipline systems, school culture and climate, and classroom learning environment are key areas for long-range planning and themes reflected in focus group data. Common topics were improving school capacities to address significant disruptive and bullying behavior, using school climate and school discipline data with intention, increasing positive relationships between students and between students and staff, professional development that will emphasize trauma responsive practices and increasing connectedness for students through club activities.

A positive approach to discipline shifts the focus of discipline from punishment to restoration of relationships and restored understanding of and commitment to rules and order. The purpose of discipline then becomes the teaching of civility and interpersonal skills and the reconnection of disconnected students. Preventive methods for defiant or disrespectful responses and re-planned responses to disruption, lays the foundation for positive disciplinary methods to be successful in creating a safe school and the appropriate conditions for teachers to instruct effectively and for students to learn.

Multi-tiered models of intervention will reduce an over-reliance on punitive methods. (2019) USDOE Parent and Educator Guide to School Climate Resources; National Center on Safe and Supportive Learning Environments (NCSSL), Office of Safe and Healthy Schools, Office of Elementary and Secondary Education, US Department of Education <https://safesupportivelearning.ed.gov>

Additionally, the Virginia School Survey of Climate and Working Conditions continues to represent significant concerns from students about bullying behaviors on school campuses, reveals negative perceptions of students regarding student-teacher relationships and highlights increasingly complex mental health needs reported by students. National poll data recently collected also highlighted the parents' observation of these concerns with 80% of parents reporting concerns about their child's mental health needs and 85% of Americans agree there is a mental health crisis among youth in the United States today. *American Educational Research Association, March 2021; https://hopefulfutures.us/research/*

Specific recent data points indicate a need for BCPS to focus on improving the safety and support levels of our learning environments. These include:

- In the 2020-21 VDOE/DCJS climate survey, student responses averaged 3.32 (5=strongly agree)) in response to the statement, "I feel safe in my classes."
- In the 2020-21 VDOE/DCJS climate survey, student responses averaged 3.09 (5=strongly agree) in response to the statement, "Students belong at this school."

- In the 2020-21 VDOE/DCJS climate survey, when asked, “How does your school’s atmosphere impact your learning?” student responses averaged 3.34 (5=It has a very positive impact).
- In the 2020-21 VDOE/DCJS climate survey, 32.7% of students reported feeling sad or hopeless almost every day for two or more weeks and 10.4% reported seriously considering suicide in the last 12 months. For those students who reported feeling sad or hopeless, only 45.9% felt they had adults they could turn to for help.
- Triennial school safety inspections have given specific feedback to schools and the district maintenance and technology departments regarding concerns on school campuses.

Indicators of Success for Goal 2:

- Completion of Capital Improvement Plan targets in long-range planning so that students and staff experience safe, comfortable and inviting spaces in school facilities.
- Provisions for systematic review and modifications of existing safety procedures and systems to improve students and staff sense of security while on campus.
- Create more robust expectations for instructive programming for mental health competencies and align school climate assessment and programming to enhance student sense of belonging and strengthen student-teacher relationships.
- Reduce the number of incidents requiring discipline sanction by 10% and enhance services for behavioral intervention through the evaluation of discipline practices and promotion of a school-wide philosophy and practice.
- By promoting teacher well-being and supporting well-managed classrooms, the division would have fewer than 3% of teachers rated as Unsatisfactory or Needs Improvement in Standard 5 (Learning Environment) and Standard 7 (Professionalism).
- Document and articulate a tiered system of mental health and behavior support with an enriched and comprehensive approach to Tier 1/mental health competency and outcome-based models for Tier II/III services.

Strategy 1: Create safe, comfortable, inviting, and modern learning, work, and activity spaces for students and staff.

Timeline	Resources	Person(s) Responsible	Progress Monitoring	
			Dates	Artifacts
Action Step: Create and update annually a BCPS Capital Improvement Plan for school renovations and other elements that affect learning.

GOAL 3: HIGH QUALITY WORKFORCE

Bedford County Public Schools will create an exemplary workforce by recruiting, supporting, compensating, and retaining high quality employees.

Rationale for Goal: BCPS must work to actively recruit quality candidates and then retain veteran and novice staff through competitive compensation and a comprehensive network of support. Of the teachers who left Bedford during the 2021-2022 school year, 45% had 0-5 years of experience which highlights the importance of instructional mentoring, new teacher support, and the creation of site based onboarding teams. We currently have 103 teachers that are new to Bedford County Public Schools and 77 of those are new to the profession. This represents 10% of the instructional workforce within the school division. On average, school divisions spend \$20,000 per new hire related to recruitment, hiring, and pertinent training.

We must remain competitive in the local job market for **ALL** staff. During the 2021-2022 school year BCPS had a 6% employee turnover rate within the division. Data indicates that the highest turnover is in the nutrition, paraprofessional, transportation, and teaching classifications. Exit survey results indicate that the top three factors influencing employee turnover within Bedford County are personal reasons (42%), retirement (23%), and salary (19%). While the data details several reasons for staff turnover, it highlights the importance of being committed to offering regionally competitive salaries.

A priority in Bedford County Public Schools is to support each employee in their ongoing growth and development. The goal is for all employees, whether they are a newly hired candidate or a highly skilled veteran employee, to continuously reflect on their professional practice and pursue desired areas of growth. Professional learning must foster autonomy and provide opportunities for professionals to witness best practices, discuss and apply new information, and explore current research. Educators desire professional development that is relevant, job-embedded, and authentic. Professional learning opportunities will allow educators to perfect their craft as they participate in presentations, hands-on workshops, and collaborative discussions.

A staff survey was conducted during 2019-2020 and again in 2020-2021 to determine the professional learning needs of BCPS staff. Staff wanted ownership of their professional growth with training that was flexible and delivered in multiple formats. In addition to the survey, 78 personal interviews were conducted and 21 site-based feedback protocols were instituted to determine how professional growth could be best facilitated. Additionally, we must remain diligent in understanding the current needs and priorities of our staff, nurture school and division climate, and celebrate staff success in order to sustain a healthy and productive workforce.

Indicators of Success:

- Percentage of properly licensed and endorsed teachers will improve from 96.58% to 98% as indicated by the Instructional Personnel Verification Report.
- The percentage of teachers leaving the county with 0-5 years of experience in Bedford County will decrease by 10%.
- BCPS will achieve a 90% or greater retention rate for certified staff annually.
- BCPS will reduce the turnover rate of classified staff by 20% by 2027.

- 100% of teachers will participate in authentic, relevant professional learning aligning to their desired professional learning pathway.
- The number and variety of professional learning opportunities available in each pathway will increase by 10% annually.

Strategy 1: BCPS will recruit qualified candidates, prioritize compensation, cultivate a positive climate, support and retain current staff, so that BCPS transforms into an employer and community of choice for central Virginia promoting positive outcomes for student achievement.

GOAL 4: MUTUALLY SUPPORTIVE PARTNERSHIPS

Bedford County Public Schools will develop mutually supportive partnerships with families and community organizations to enhance student well-being and broaden opportunities for workforce development.

Rationale for Goal:

Bedford County Schools recognizes the important role families and community partners play in building better futures for students. Input from surveys and twenty-three (23) focus groups including students, families, educators, board members, PTA County Council, and community partners was collected and analyzed. Post entry reflections from the Superintendent, based on community meetings held in 2021, indicates a need for a focus on improved communication and engagement with families and providing equal opportunities to students in all three school zones.

In collaboration with the Demographics Research Group of the Weldon Cooper Center for Public Service at the University of Virginia, the research report [Virginia's Workplace Readiness Skills: Framework for the Future](#) (PDF) has been shared with school divisions. The purpose of this research was to evaluate Virginia's current 21 Workplace Readiness Skills and to make certain they are up-to-date and aligned with the needs of employers. Hundreds of employers throughout the Commonwealth have been interviewed or surveyed to determine the most essential workplace skills for entry-level workers. Based on this data and in collaboration with community work partners, all learning pathways will incorporate workplace skills and on the job training through high school internship opportunities.

Based on the 2020-21 school quality profile, 534 students graduated with one or more Career Technical Education (CTE) credentials. Bedford County Schools offers a variety of CTE courses that also receive dual enrollment credit.

Bedford County Public Schools works with Central Virginia Community College and the University of Lynchburg to offer dual-enrollment programs that provide opportunities for qualifying juniors and seniors to meet high school graduation requirements while simultaneously earning college credit. Dual enrollment courses may be offered on the college campus or on school based campuses. Since these college credits transfer to all Virginia colleges, families can reduce future college tuition costs for students. Based on the 2020-21 School Quality Profile, 12% of Bedford County students in

grades 9-12 are enrolled in at least one dual enrollment course. In addition, only 33% of students in Bedford County continue on to higher education opportunities.

According to the Community College Research Center, participation in dual enrollment can help students succeed in higher education by giving them a realistic idea of what college requires and giving them a head start on college-level work. Research from the Oregon Research Center indicates that dual credit students who go on to college continue to the second year at a higher rate than freshmen who enter college without having earned dual credit. In addition, dual credit participants who continue to the second year of college earn a higher first year GPA.

Data gathered through focus groups indicated that program offerings could be more clearly explained to students and families on our division website, within our Program of Studies, and by hosting additional information sessions. In order to offer equal access, promotional materials and information must reach the students and the families. By combining student interest with workforce needs, Bedford County Schools can offer opportunities for students as soon as they graduate.

A consistent body of research concludes that parents are the first and foremost influence on their child's development and school success. When parents are involved, students get better grades, score higher on standardized tests, have better attendance records, drop out less often, have higher aspirations, and more positive attitudes toward school and homework.

Indicators of Success:

- Using a survey for high school parents and students, data will be gathered on the ease and access to information from the school division for college or career planning. Data will indicate an increase of 20% in satisfactory access to information, program planning, and options for high school students.
- The number of students successfully completing at least one dual enrollment course will increase from 12% to 32% in 5% increments over the next five years.
- The number of students successfully completing a CTE credential will increase from 534 to 560 over the next five years.
- A list of events/activities held throughout the division with community partners provided annually.

Strategy 1: Encourage opportunities for family support and increased communication so that knowledge of student opportunities are enhanced.
